Position: Senior Quantitative Developer - Spot & Futures Execution

Target Organization: Wintermute (London, UK (Remote))

Dear Hiring Committee at Wintermute,

I am writing to present my candidacy for the Senior Quantitative Developer - Spot & Futures Execution role at Wintermute.

As the architect of AURA (<https://www.auratrading.org/>), a proprietary 24/7 algorithmic execution system spanning crypto spot and equity markets, I have developed rigorous walk-forward optimization pipelines, successive halving parameters, dynamic risk regime detectors, and low-latency exchange interfaces in Python 3.11 and C++.

I am eager to bring this proven algorithmic engineering rigour to Wintermute's quantitative strategies.

Sincerely,

Ahmet Halit Ünsal
