Position: Quantitative Developer (Trading and Client Controls)

Target Organization: Deutsche Bank (London, United Kingdom)

Dear Hiring Committee at Deutsche Bank,

I am writing to present my candidacy for the Quantitative Developer (Trading and Client Controls) role at Deutsche Bank.

As the architect of AURA (<https://www.auratrading.org/>), a proprietary 24/7 algorithmic execution system spanning crypto spot and equity markets, I have developed rigorous walk-forward optimization pipelines, successive halving parameters, dynamic risk regime detectors, and low-latency exchange interfaces in Python 3.11 and C++.

I am eager to bring this proven algorithmic engineering rigour to Deutsche Bank's quantitative strategies.

Sincerely,

Ahmet Halit Ünsal
